## Work Package 6: Creating impact

The aim of this work package is to ensure the dissemination of the results and knowledge obtained within this project regarding the digital traceability chain for AC voltage and current and the transition from the analogue to digital metrology in the electrical field. Special attention will be paid to the efficient dissemination of the project outcomes and to assure the availability of these outcomes for their exploitation by stakeholders, manufacturers of electrical measuring instruments and standardisation bodies, by taking into account the needs of the stakeholders and the market during the development of the project.
